

From a PDF to a working system.

For companies that need a working operating layer after a Sprint, workshop or readiness assessment.

€7,500–20,000 · 3–6 weeks

50% at kickoff, 30% at configuration review, 20% at launch.

THE PROBLEM

Most AI assessments end as a document in a shared folder: ownership drifts, evidence scatters, and no one can say whether the actions are actually done.

OUTCOME

AI governance becomes visible, owned and repeatable, something your team updates as new tools and vendors arrive.

WHAT SAFA DELIVERS

- An AI system registry: systems, vendors, owners and status
- A risk and control tracker with owners and deadlines
- An evidence structure: policies, notices, approvals, records
- Workflow setup: intake, review, approval and escalation
- A management dashboard plus hands-on team onboarding

Best for: companies with multiple AI tools or vendors, and teams that already completed a Sprint or Assessment.
