

Get AI-use clarity. In 10 business days.

For companies using chatbots, AI-generated content, virtual assistants or other AI-enabled workflows in the EU or serving EU users.

€4,900–7,500 • 10 business days

60% at kickoff, 40% on delivery.

THE PROBLEM

Most companies cannot say which AI systems they actually use, who owns each vendor relationship, or whether customers are clearly told when they are talking to AI.

OUTCOME

You leave with a clear view of your AI use, practical transparency improvements, accountable owners and a credible next-step plan, not a generic policy PDF.

WHAT SAFA DELIVERS

- An AI-use inventory for the agreed systems, tagged by use case and audience
- Provider or deployer role triage, mapped to what actually applies to you
- Draft user notices for chatbots, assistants and AI-mediated interactions
- A labeling guide for AI-generated images, audio, video and published text
- A control register and a one-page internal AI-use policy your team can run

THE BOUNDARY

This is a practical readiness and implementation engagement. It does not replace advice from your own legal counsel, a formal conformity assessment, or certification. We work alongside your counsel, never in its place, and never promise a guaranteed compliance outcome.

Best for: retail, e-commerce, hospitality, agencies, logistics and professional-services firms already using AI tools supplied by vendors.
